

# Cryptocat

The screenshot shows the Cryptocat lobby interface. At the top, there's a search bar labeled "conversation name" with a placeholder "Enter the name of a conversation to join." Below it is a "nickname" input field and a "connect" button. A blue callout points from the "conversation name" field to the text "Converstaion Name". Another blue callout points from the "nickname" field to the text "Nickname". At the bottom, there's a section titled "Private Conversations for Everyone." with some tips: "Welcome to Cryptocat. Here are some helpful tips:" followed by two items: "Cryptocat is not a magic bullet. You should never trust any piece of software with your life." and "Cryptocat can't protect you against untrustworthy people, key loggers, and does not anonymize your connection." The footer includes version "2.1.6", language "English", and a "Custom server" option.

**Converstaion Name**  
Share the converstaion name with everyone you want to chat with.

**Nickname**  
This is your name. Everyone else in the converstaion can see your name.

After you have filled out the conversation name and nickname, click connect.

The screenshot shows a group conversation in Cryptocat. At the top, it says "archstar@lobby". Below that, there are two messages: "archstar" says "Hello" and "l153" says "heyho". To the right is a sidebar titled "Conversation" with a list of users: 0x (highlighted with a blue dot), kindaspartan, nypt, many\_hats, helix, l153, lobby, dav, kitto, redhorizon, lib, and monolith. Each user has a small dropdown arrow next to their name. A blue callout points from the "Conversation" sidebar to the text "Click on another user's nickname to start a private chat with them. Click on the white arrow next to ther nickname to view info, send a file, or block the user." Below the sidebar is a text input field and a blue "Send" button.

Click on another user's nickname to start a private chat with them. Click on the white arrow next to ther nickname to view info, send a file, or block the user.

- █ Change status between available and away.
- █ View the fingerprint for you and the conversation.
- █ Turn the sound on and off.
- █ Leave the conversation.
